Treasurer, Grace B. Scribner.

Auditors, John A. Gleason, Guy A. Craig.

TOWN WARRANT

STATE OF NEW HAMPSHIRE

To the Inhabitants of the Town of Dublin qualified to vote in
Town Affairs

You are hereby notified to meet at the Town Hall in said town on Tuesday the 8th day of March, 1921, at nine o'clock in the forenoon to act on the following subjects:

First. To bring in your ballots upon each of the questions submitted by the Convention to Revise the Constitution relative to the amendments proposed by said Convention at a session held on January 28, 1921.

Second. To elect a Town Clerk and a Town Treasurer for the ensuing year.

Third. To elect three selectmen, one for one year, one for two years, and one for three years.

Fourth. To choose all other necessary town officers, agents, auditors, and committees for the ensuing year.

Fifth. To hear the reports of agents, auditors, officers, and committees heretofore chosen, and pass any vote relating thereto.

Sixth. To see if the town will vote to instruct the selectmen to secure the services of a man who has been actually trained and drilled in the knowledge and skill of the road-building profession, to carry out the road and other work as prescribed in the Welfare Association's road committee's report as printed and distributed, or pass any vote relating thereto.

Seventh. To raise and appropriate such sums of money as may be necessary for the Public Library, for the maintenance of the poor, for the building and repairing of highways and bridges, for electric lights, for observing Memorial Day, and for other necessary charges arising within the town.

Eighth. To see if the town will vote to instruct the selectmen to apply for State Aid for highways for the ensuing year and pass any vote relating thereto.

Ninth. To see what sum of money, if any, the town will vote to raise and appropriate for the purpose of protecting trees against the spread of White Pine Blister Rust, to be expended under the direction of the selectmen, in cooperation with the State Forester, said appropriation not to be expended unless three times a like amount shall be available for the purpose from other sources.

Tenth. To see what discount or discounts, if any, the town will vote for early payment of taxes.

Eleventh. To see if the town will vote to replace the street lights around the lake, and on the Jaffrey road, raise and appropriate money for the same or take any action relating thereto.

Twelfth. To see if the town will vote to procure additional fire equipment, raise and appropriate money for the same, or take any action relating thereto.

Thirteenth. To see if the town will vote to raise and appropriate money to complete the road on the west side of the lake or pass any vote relating thereto.

Fourteenth. To see if the town will vote to purchase a new road machine, raise and appropriate money for the same or pass any vote relating thereto.

Given under our hands and seal this 19th day of February, 1921.

WILFRED M. FISKE,
ARTHUR T. APPLETON,
ARCHIE R. GARFIELD,
Selectmen of Dublin.

Summary of Inventory

Polls, at \$3.00	16

REPORT OF THE HIGHWAY AGENT

Eight thousand dollars was appropriated at the last annual Town Meeting for highway purposes. Owing to the unusual amount of snow a year ago, about \$3,000 of this appropriation was spent for breaking roads last winter, which left the available funds for summer use of much less. Scarcity of good help and high wages, perhaps more than laborers have ever before received for similar work, made the problem extremely difficult. Added trouble resulted from the use of heavy trucks on the soft dirt roads in the spring of the year, and during the rainy summer weather, which moved heavy lumber from the east part of the town to the railroad stations. About sixty-five miles of road

had to be repaired and looked after therefore, with approximately \$5,000. of money available.

I put in 15 new corrugated steel culverts, which I believe to be the best available thing for replacing the old stone culverts. In the bridge on the highway leading from Bond's Corner to the Burr place, I put in five new oak stringers, and re-planked it. Heavy traffic with auto-trucks has made double planking necessary in the east section of the town, with the plank running two ways. This was done on the bridge near Peter Naylor's, on the Peterborough road; on the bridge near No. 3 schoolhouse leading from Bond's corner, with nine new oak stringers added; on the bridge by Knights' mill over the old flume; the bridge on the Keene road by the old Howe reservoir, with 13 new stringers added. I new planked the bridge near No. 3 schoolhouse on the Goldmine road; new planked the bridge on the road running past the King place, and put in five new oak stringers on the bridge near the Derby farm, on the Jaffrey road.

A large amount of gravel was carted on to the back roads where the heavy trucks had badly cut up the dirt roads, but it is a physical impossibility to keep them in even fair condition while lumber trucks are being operated over them during all kinds of weather conditions, with the use of the money now available, and my experience in road-work covers over a period of thirty-five years in the town of Dublin.

At an expense of about \$150, I widened the corner at the turn where the Jaffrey road leaves the main street. With an expenditure of \$120, I widened the road through the Centennial Woods; also widened the road near Miss Silsbee's. I believe that these improvements which add to the safety and convenience of those using the roads is worth ten times the expenditure of money laid out, and by taking care of three or four such places each season, a great deal of permanent good would be accomplished.

All of the roads have been gone over with the scraper, and considerable brush has been cut along the roads in various sections of the town; but the limited funds available for road work have made it impossible for me to accomplish all I would like to have done.

I would especially recommend that a reasonable amount of money be laid out on the so called "Old Harrisville road," where several new residences have been built, a large amount invested by members of the summer colony, and where the road is now in very bad condition.

Following is an inventory of the machinery and tools now owned by the town, and available for highway use:

- 1 Giant Road Machine, condition good.
- 1 2-Horse Russell Jr. Road Machine, condition poor.
- 2 Brush Road Drags, also other drags; useless.
- 5 Snow Rollers, good condition.
- 2 Iron Bars, 2 Stone Hammers, 2 Drills, 3 Hoes.
- 2 Dungforks, 6 Shovels, 2 Rakes, 6 Picks, 1 Axe.
- 1 Pair Bush Cutters.

The town also owns 1 Buffalo Steam Roller, the condition of which I know nothing about; it has been loaned to the town of Marlborough for the past two seasons most of the time, which seems questionable business policy for the town to follow.

There is also owned by the town 1 Stone Crusher, with Bins, both of which have stood out of doors ever since the town bought them, and which for this reason has not improved their condition.

GEORGE W. BURPEE,
Highway Agent.

REPORT OF TOWN AUDITORS

We wish to call attention to the fact that due to the increased amounts handled by the town, the increased complications of the town's accounts and the increased connections with the accounts of the state the Tax Commission has requested the auditors to insist upon properly itemized bills being presented with every payment of the town's funds.

A few bills have been presented that did not comply with the above requirements, and the auditors have been obliged to have corrections made, and in some instances new bills prepared, before they could accept the accounts as properly cast and vouched.

All town auditors, officers and agents who have the handling of public funds should see that these instructions of the Tax Commission, and the statutes of the state, are carefully followed.

Having examined the following accounts, to wit:—

Selectmen's,	Tax Collector's,
Treasurer's,	Library Committee's,
Clerk's,	Library Building Trustees',
Town Trustees',	Librarian's,
Historical Society's,	

we find them correctly cast and properly vouched.

JOHN A. GLEASON,

GUY A. CRAIG,

Auditors.

REPORT OF SCHOOL BOARD

We respectfully submit to the Dublin School District the ninety-ninth annual report of our schools.

The schools have been taught by a very efficient corps of teachers and the scholars have made good progress during the past year. Extensive repairs have been made at Nos. two and three under the direction of the state board so at the present time these two schools are in fine shape.

The cost over run the estimate somewhat as it was thought best to do some outside painting as the buildings needed it badly.

The transportation of pupils has been a heavy expense during the past year together with the increase in the salary of the teachers and the high cost of fuel has made the total expense much more than anticipated one year ago. Trouble has developed in the sewer pipe from the schoolhouse to the cesspool at No. 1 and will have to be seen to as soon as the ground is thawed out in the spring. The grading at No. 1 was supposed to have been done by Mr. Walker early in the summer but he moved away and we were unable to procure anyone else in time to have the work done before September 1st. The following is the estimated budget for the ensuing year.

High School tuition	\$600 00
Salaries School District Officers	250 00
Medical Inspection	50 00
Interest	500 00
Maintenance and Fuel	7,450 00
Books and supplies	250 00

In addition to the above it will be necessary to raise the sum of \$2,000. to cover the expense of the schools until the close of the school year.

HARRY F. MASON,
CLARENCE D. SCRIBNER,
ALICE F. APPLETON,
School Board.

REPORT OF DRAWING SUPERVISOR

SUPT. L. E. PRIOR,

My dear Mr. Prior: Drawing lessons began in the three schools of Dublin the last week of September.

The children of each school were divided into two groups, those in all grades below and including the fourth grade work with me while those in the upper grades have a singing lesson, or vica versa. This arrangement has proved quite successful, and, with the exception of three weeks when the roads were bad, both groups in all three schools have received a weekly lesson, the periods averaging forty-five minutes in length.

In the lower grades the simplest principles of lettering, figures, objects and landscapes are taught, the children learning by self-expression as they make pictures, games or hand work.

The problems of the upper grades during the fall term included silhouette pictures, lettering cut paper stencils, and gifts suitable for Christmas which required careful measuring. This term they have studied the principles of the ellipse, making poster pictures of various round objects. Their last project, which relates drawing with one of the practical needs of the business world, takes the form of a contest. A prize will be offered for the best poster advertising certain wares of G. W. Gleason and Son's, and the posters will be exhibited in that store.

The spirit and interest of the young people in their drawing lessons is indeed gratifying. I heartily thank the members of the Board of Education and all the teachers for the courtesies and cooperation extended to me, for their kindnesses are deeply appreciated.

Respectfully submitted,

HILDA HAYWARD,
Supervisor of Drawing.

REPORT OF MUSIC SUPERVISOR

MR. L. E. PRIOR, Superintendent: During the first half of the year in the Dublin schools, it was my chief aim to interest the children in music, and to make them thoroughly enjoy it. In trying to accomplish this, I spent the greater part of each period in singing songs, old and new stressing interpretation and tone quality. Only such technical work as seemed necessary in that particular lesson was introduced or reviewed.

In the Village school, I was able to take up more technical work and do more thorough work in general, as the periods were longer. In the upper grades of this school, I spent nearly half the period in a sort of "Community Sing," using the well known old songs. The class seemed to enjoy this greatly, and responded well in the singing.

Just before Hallowe'en, Thanksgiving and Christmas, I used practically all the time for the songs for the various entertainments given by the schools. This presented something definite to work toward and aroused the interest of the pupils.

In each of the rural schools, I divided the grades, having the first four in our division and the four upper grades in the other. As far as possible, I kept the corresponding divisions of the two schools together, giving them practically the same songs and technical work. Although none of the schools are as far advanced in the mechanics of music as I would like to have them, I felt that it was better to go slowly, and be sure that what was taken up was really learned, than to accomplish more, hurriedly. In the lower grades, therefore, I took up the first two time motions, staff reading and scale work; in the upper grades, the first three time motions, more advanced work in exercise reading and various other facts arising in the lessons.

In the Village school, this work was more nearly up to grade, owing to the longer periods.

Respectfully submitted,
MADELYN A. ALDRICH.

TO THE BOARD OF EDUCATION OF DUBLIN, N. H.: In compliance with your request, I examined the schools of your Town.

Of the seventy-seven children I examined all but one or two that were absent on account of sickness. I examined as from the regular State examination and I wish to state that I found but very few defects in all of the (3) districts of your Town.

I did not find a case of malnutrition in the entire lot of children.

The teeth showed evidence that the parents were having them looked after and I found but few bad cases.

I think that too much care cannot be placed upon the teeth of school children, as it is a source of much trouble bad breath and much infection to the system.

All first teeth of children should be looked after by a competent dentist, as much damage to the following set of teeth may take place if neglected.

I cannot speak too highly of the fine test the children passed in eye test, very few corrections had to be made of which you may well be proud. One reason for this may be the splendid light that you have in all of your schoolhouses ~~on~~ matter that I cannot speak too highly of. I think that it is the most even distribution of light in all three of your school buildings of any school houses I have yet visited and it speaks well of a country Town.

You have paid careful attention to sanitation, about your schools. I found a very excellent condition about the toilets and well and neatly kept. School rooms were orderly, neat and well heated.

I found a fine lot of young people, of which you as parents may well be proud, not a single serious physical defect did I find in the entire district which I think speaks well for you as a Town.

One criticism that I wish to make in all the schools, a thoughtless use of the word "Yes sir" and "no sir" and yes thank you and no thank you. Good manners are a part of our education and there is a sad lack among young people of today in this respect.

I wish to take this occasion in thanking the teachers of the school for their splendid cooperation and assistance, at the time of the examinations it helping me a great deal in my work.

Very Respectfully,

CHAS. H. CUTLER, M. D.

February 1, 1921.

REPORT OF SUPERINTENDENT

TO THE SCHOOL BOARD OF DUBLIN:

Herewith is submitted my second annual report on the condition of your schools up to the present time, the statistical table being for the school year ending Aug. 31st. 1920.

BUILDINGS

In my last report I mentioned the fact that it was the policy of the State Board of Education that, in time, every school district in the state should possess school buildings of an adequate standard, so that every child in the state should attend school in a sanitary building, suitably lighted, properly cared for, and adequately equipped with the requisite amount of school appliances necessary to conduct successfully the process of

education. How near the Dublin schools come to this standard in respect to school buildings an examination will show.

The buildings at number two and three have been remodeled to a considerable extent. New windows have been put in so that now, in both schools, the light is entirely adequate, and from the right direction, the left and rear of the pupils. The windows on the right do not effect to any appreciable extent the light falling on the pupils desk. This is a marked improvement over the condition last year, especially at number three where the lighting was very bad. The interior walls and ceilings have been tinted which adds greatly to the general appearance of the two rooms as well as helping to improve the lighting problem. The toilets have been entirely remodeled so that the entrance to both the girls and boys toilet is from the school room through a covered passageway. This obviated the necessity of going out of doors through the slush and mud to gain entrance to them. At number three, also a jacketed stove has been put in which improves greatly the heating of the room. These two buildings now, I think, would meet any reasonable standards which might be set. They are good comfortable buildings, well arranged for school purposes and the district has a right to be proud of them.

The only thing needed now to make them attractive in every way is some attention to the outside surroundings. The yards need to be cleaned up, and the premises made attractive. This, I think, should be attended to by the pupils themselves, under the direction of the teacher, and in the spring, when the weather conditions are favorable this matter will receive attention.

The buildings have all been cleaned at least once during the year. At number two and three the teachers themselves have scrubbed the floors. As in former years the great difficulty in getting the buildings cleaned is the almost impossibility of getting any one to do the work. It is to be hoped that this year this difficulty will not be so great.

In the character of the school buildings, therefore, we see a distinct improvement over last year.

ATTENDANCE

An examination of the statistical table which is on another page discloses the fact that our attendance last year was not as good as it should have been, the per cent. being only 88.6 this is a poor showing. The state average for the last two years was 91.6%. Of course, weather conditions were against us but no more so than in other parts of the state.

We should not be content with our record of attendance until

it comes up to, and it ought to surpass, the state average. Even then we should not be satisfied unless the record represents the best that we can do. While various factors may enter into the regularity of attendance, the one permanent feature is that irregularity in attendance is a quite positive indication of poor work in school.

The attendance for the first 18 weeks of the present year is encouraging, being 92.2%. If this record can be kept up for the remainder of the year we shall be able to show a good rate of improvement over last year. Attention should be called to the attendance in the number two school thus far this year. The per cent has been 98, with no cases of tardiness reported. Under normal conditions what one school can do is possible for all, though, of course, various local conditions will modify it.

Last year there were 265 cases of tardiness reported, thus far this year there are only 82, an average of 1.5 for the average daily attendance of the schools. Tardiness is an evil considered of minor importance by many, yet it is an indication of weakness somewhere. The habits formed in school are apt to follow a child through life, and if he is not required to be punctual at school, he will not be punctual in his engagements when he gets out of school unless the lesson is brought home to him by some distressing experience. Punctuality is a habit which must be taught in school, and it requires the cooperation of home and school.

GENERAL SCHOOL WORK

The formal work in the schools is, in the main, similar to that followed in previous years. In the grammar school in the village no attempt is being made this year to any work other than the regulation work of the grammar grades. Latin and Algebra are not being given, it being thought more profitable to spend the time on other subjects. These subjects are, without doubt, being taught more thoroughly and carefully. The reading in the primary grades is very satisfactory, the children having already read more than the required number of books for this time of year. Drills and standardized tests are being used in an effort to find out just how each grade stands in regard to the different subjects, particularly arithmetic, reading and spelling, and to put emphasis on the places where weakness is disclosed.

For an idea of the work in music and drawing I would refer you to the report of the supervisors of these subjects.

The school in number five for the current year has been discontinued, and the children brought into the village. The

average attendance in that school last year was 5.1, and for the latter part of the year was even smaller than this, for a part of the time only three being in attendance. It is unprofitable, both in money and effort, to keep such a small school open when the children can be provided for elsewhere. The spirit of the school is bound to be dull and listless, and there is no special incentive to do faithful work.

MEDICAL INSPECTION

For the year ending Aug. 31st. no inspection of the school children was made owing to some unforeseen circumstances. During the fall of the present year Dr. Cutler was secured and a thorough examination given the children and the following defects discovered.

Defective vision	5
Cardiac disease	1
Pediculosis	1
Defective teeth	23
Hypertrophied tonsils	10
Adenoids	1
Scabies	1

COST OF EDUCATION

The increasing cost of schools and of everything pertaining to education is a fact, viewed by some with anxiety and apprehension, and by others with a keen appreciation of the necessity of keeping the training of the youth of the country at the maximum of efficiency. It is a fact, of course, that the cost of education has greatly increased. If it were not so we might justly surmise that its efficiency was being lowered. In the rapid rise in the cost of all kinds of human activity it is not to be wondered at that education has felt the effect. That it has responded in undue proportion to this rising tide is, we may safely assert, not the case. Probably the reverse is true and if comparative figures were at hand we should find that the cost of schools have not increased at the same rapid rate of many other forms of activity. However this may be all realize, probably, as never before the necessity of keeping the schools at a maximum of efficiency. If this involves greatly increased costs this must be met, with an added determination that full value must be returned for the expenditure involved. This is the important phase of the problem. If the schools are to cost a great deal more we may justly demand that they return more

to the community in a fuller development of the boys and girls resulting in a richer civic and economic life.

In all the present unrest and turmoil which is sweeping over the country we must look to the schools as one of the stabilizing factors in the situation. And especially is this true in a democracy such as ours where the general intelligence of the people is the prime condition of stability. Therefore, no community can afford to let its schools deteriorate, not only because of the calamitous results to itself, but also, because of the danger involved to the state and nation as well. No community can be a law unto itself. It touched other communities in so many important ways that a weakness in anything so vital as education is bound to effect the whole.

Permit me to express my hearty appreciation of the help and cooperation of the School Board during the past year, and of the interest of the community in the welfare of the schools.

Respectfully submitted,

L. E. PRIOR,

Superintendent.

GRACE B. SCRIBNER,		
Treasurer.		

REPORT OF SCHOOL DISTRICT AUDITORS

Our statement regarding town accounts, appearing elsewhere in the printed reports, applies equally to School District accounts.

Having examined the account of the School District Treasurer we find it correctly cast and properly vouched.

JOHN A. GLEASON,

GUY A. CRAIG,

Auditors.

SCHOOL WARRANT

STATE OF NEW HAMPSHIRE

To the Inhabitants of the School District of the Town of Dublin
Qualified to Vote in District Affairs

You are hereby notified to meet at the Town House in said District on Tuesday March 8th at two o'clock in the afternoon to act upon the following subjects:

First. To choose a Moderator for the ensuing year.

Second. To choose a clerk for the ensuing year.

Third. To choose a Treasurer for the ensuing year.

Fourth. To choose a member of the School Board for the ensuing three years and other necessary officers and committees arising within the district.

Fifth. To hear reports of agents, auditors, committees and officers heretofore chosen and pass any vote relating thereto.

Sixth. To raise and appropriate such sums of money as will be needed to pay all necessary expenses of the district for the ensuing year.

Seventh. To see if the District will vote to raise and appropriate the sum of \$400 to make the necessary changes in the sewer and cesspool at number 1.

Given under our hands and seal this Fifteenth day of February 1921.

HARRY F. MASON,
CLARENCE D. SCRIBNER,
ALICE F. APPLETON,
School Board of Dublin
